

PCW-01 Washer Regulator

For female 1/2" threads

Remove the washer from the shower hose and install the PCW-01 between shower faucet & shower hose (recommended), or between shower hose & shower head.

Can also be used in shattaf hose.

Please note that if the PCW-01 is fitted between shower faucet & hose, it needs to be inserted face-up in the hose; between shower hose and shower head, insert it upside-down (see illustrations).

Do not use with pressureless boilers.
